

Clinical Diagnostic Report (AI-Assisted)

Generated using AI-assisted clinical decision support

Executive Clinical Summary

The AI system suggests a moderate-risk finding of 'Sick'. This assessment should be interpreted in conjunction with clinical symptoms, recorded vitals, patient history, and the final judgment of a qualified medical professional.

Patient Information

Patient Name: **Mock Patient**

Report Date: **29 Jan 2026**

Report ID: db738724-561b-4ec7-89d1-913fe3afd67f

Test Type: Tuberculosis Screening

AI Analysis (Assistive)

AI-Suggested Finding: Sick

AI Risk Stratification: MODERATE

MODERATE

Model Confidence: 99.6%

Note: AI outputs are probabilistic and intended to assist—not replace—clinical decision-making.

Clinical Context

Reported Symptoms:

- Pain in head and lungs

Recorded Vitals:

bp: 90/120

heart_rate: 97

temperature: 38

Doctor's Final Clinical Review

This section represents the final medical decision by a qualified healthcare professional.

Reviewing Doctor: Dr. Mock Doctor

Clinical Decision: Confirm AI

Doctor's Notes:

The result is indeed correct.
